Description

In this course we review the history of American social welfare provision; examine poverty and various ways of defining and measuring it; evaluate evidence about the scope and causes of hunger and homelessness; and examine and evaluate the welfare “reform” of 1996 and its reauthorization. We pay particular attention to the importance of (often mythic) ideas about work, about women and about African-Americans in welfare politics and policy-making. Our focus is on welfare narrowly defined: while we will pay some attention to the broader protections of the *welfare state* (old age pensions, health care, unemployment insurance), our target is means-tested cash and in-kind benefits available only to (some of) the poorest Americans.
